WHAT TO CONFIRM BEFORE ORDERING

- Oral and cosmetic grades follow different specifications. State the intended use before requesting a quote.
- Asiaticoside and madecassoside are separate markers; a total triterpene value does not substitute for either.

Indicative document. This sheet describes the grade we can quote; it is not a batch COA and does not confirm a specific result for a specific lot. Final specification, contaminant limits, and documentation are agreed in writing before the order. Source, part, carrier, and marker method are release parameters, not marketing descriptions.
