- Dihydromyricetin is poorly water-soluble; a dispersible grade may be needed.
- Confirm the source leaf and the residual solvent profile.

Indicative document.

This sheet describes the grade we can quote; it is not a batch COA and does not confirm a specific result for a specific lot. Final specification, contaminant limits, and documentation are agreed in writing before the order. Source, part, carrier, and marker method are release parameters, not marketing descriptions.

DOCUMENTATION RELEASED WITH EACH LOT

DOCUMENT	CONTENT	SCOPE
Certificate of analysis	Identity, assay, physical parameters, contaminants, methods, limits, and release decision.	Batch-specific
Technical data sheet	Botanical source, plant part, carrier, solubility, storage, packaging, and applications.	Product-level
Safety data sheet	Sixteen sections covering hazards, handling, storage, transport, and emergency response.	Grade-specific
Allergen and GMO statements	Major allergens, gluten, animal-derived inputs, and GMO status.	Batch-specific
Origin and traceability record	Herb lot reference and the link to the manufacturing lot.	Batch-specific
Halal, Kosher, organic	Certificates where the grade and facility are covered; organic also requires a transaction certificate.	Per certificate scope

TESTING APPROACH

- **Identity:** macroscopic and TLC fingerprint against a reference.
 - **Assay:** HPLC or UV-VIS with the method and basis stated on the COA.
 - **Physical:** appearance, moisture, ash, mesh, bulk density, and flow.
- **Contaminants:** heavy metals by ICP-MS, residual solvents by GC, pesticide panel by LC-MS/MS and GC-MS/MS.
 - **Microbiology:** TPC, yeast and mould, E. coli, and Salmonella, with additional organisms as agreed.
 - **Verification:** third-party testing available for new suppliers and high-value grades.
